

# HOCKMEYER

**PROVIDING PROCESS SOLUTIONS AROUND THE WORLD**

## CMX VESSEL WASHER

To efficiently clean multiple size tanks, totes, and drums. The rotating brush and spray nozzle assembly provide the mechanical scrubbing action to clean even the toughest residue effectively.

- Adjustable spray nozzles
- Heavy & sturdy construction
- Dual high-pressure hydraulic hoists to raise and lower the machine
- Skid mounted for ease of installation
- All hydraulic and solvent connections installed, and factory tested
- XP PLC control station or touch screen display
- One-piece brush bracket to allow quick change of brushes
- Cover assembly with a chemical resistant seal for vapor and liquid containment
- Tilt device for flushing/rinsing
- Caustic application designs available
- 304 wetted parts and caustic applications designs available

### BRUSH MATERIALS

- High mechanical strength, stiffness, hardness, and toughness
- Good fatigue resistance
- High mechanical damping ability
- Lower water absorption rate
- High chemical resistance
