MAINTENANCE CART

This portable cart is specifically designed to ensure the Immersion Mill's easy disassembly when changing media, screens, or pegs. The cart is built to operate interchangeably with all models and is mounted on casters for easy storage and maximum mobility. The grind chamber support is designed to accommodate various mill sizes and is removable for easy media recovery. The removable bottom screen allows the solvent to drain from the dish while retaining the media. The Maintenance Cart must-have for convenience, safety, and speed when servicing your Immersion Mill.
