

HOCKMEYER

PROVIDING PROCESS SOLUTIONS AROUND THE WORLD

HCP 1/4 IMMERSION MILL

The intermediate step for linear scalability from the lab to the production floor. Ideal for establishing and validating new processes and for small-batch manufacturing. Forecast the performance of your batches in full-scale working conditions with the 1/4 mill production-ready capabilities.

- Designed for easy operation, cleaning, and changeovers
- Upper auger to optimize the rate of feed into the mill
- Vessel locking device
- Basket assembly with high-energy counter-peg design
- Bottom propeller or turbo styles
- Clamped opening for product sampling
- 304SS lid for fume containment
